TASTE

The flavors of spruce, kumquat, angelica root, and bright citrus meet earthy richness and white pepper to create an exciting yet versatile gin. Four distinct and prominent flavors, juniper, citrus, spice, and floral combine to create a gin delicious enough to drink straight.

Wire Works is perfect in classic cocktails, including the dry martini and the negroni, yet encourages bartenders to explore their creativity.

BACKGROUND

Wire Works Gin was born from long hours experimenting and a seemingly endless refinement of the recipe. After over 50 attempts of adding and subtracting different levels of juniper, coriander, angelica root, with 29 other potential botanicals, GrandTen's founders, Matt and Spencer, finally found the magic formula. They ultimately decided on 9 botanicals including locally sourced cranberries.

PROCESS

Wire Works is batch-distilled at GrandTen Distilling in Boston Massachusetts. Instead of using a gin basket, the botanicals are macerated during the final distillation. Distillation takes place in a 50 gallon Adolf Adrian pot still with ball shaped hat and a parallel mounted column with four rectification plates and amplifier.

WHAT'S IN THE BOTTLE

Botanicals (9 total)

GrandTen Distilling

WE STARTED GRANDTEN DISTILLING because we love spirits and, just like you, enjoy a nice drink at the end of the day. Our mission is to create distinctive products that will satisfy the growing number of savvy cocktail drinkers. We are inspired by new and interesting flavors, but also take pride in producing high quality, classic spirits. Our flagship product, Wire Works American Gin, celebrates the history of the famous South Boston iron foundry that once occupied the space where we now distill.
