GrandTen Distilling

WE STARTED GRANDTEN DISTILLING because we love spirits and, just like you, enjoy a nice drink at the end of the day. Our mission is to create distinctive products that will satisfy the growing number of savvy cocktail drinkers. We are inspired by new and interesting flavors, but also take pride in producing high quality, classic spirits. Our flagship product, Wire Works American Gin, celebrates the history of the famous South Boston iron foundry that once occupied the space where we now distill.

"The booze-making version of Breaking Bad." –Urban Daddy

TASTE

A fresh approach to an iconic flavor, Craneberry provides the perfect balance between cranberry tartness and sherry-like dryness. The rich cranberry flavor blends well in whiskey cocktails, and adds just the right amount of tart sweetness to any vodka, gin or rum based drink. Never sugary, this spirit offers a truly unique depth of flavor unlike any other cranberry liqueur.

BACKGROUND

Named by early settlers of Massachusetts after the crane-like appearance of the cranberry flower, the full bodied heart of the spirit comes from the distillation of blackstrap molasses, while the rich color and luscious finish come from resting in used cabernet barrels with hundreds of pounds of Cape Cod cranberries. Craneberry is a truly refined spirit that adds an elegant layer to any cocktail or may be enjoyed neat as an after dinner treat.

PROCESS

We begin with blackstrap molasses and evaporated cane juice, then add a blend of Caribbean yeasts. After fermentation, we send it through our all-copper, small-batch still. The resulting spirit is matured in used Cabernet wine casks to give it an excellent dry finish. Post barrel, we soak on cranberries for two weeks before the final proofing.

WHAT'S IN THE BOTTLE

Base Materials

- Blackstrap Molasses
- Evaporated Cane Juice

Flavor

- Cape Cod Cranberries
- (No "natural" or artificial flavors)

Water

- From the Quabbin Reservoir
- Rated best tasting water in the country
- Reverse osmosis and carbon filtered to remove chloramines and fluoride (we don't think they add to the taste)
