Range of Markets

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Currencies & Precious Metals

Currencies and precious metals are among the most popular trading assets. Swissquote's offer comprises major, minor and emerging currency pairs as well as precious metals, allowing you to trade around the clock and take advantage of opportunities all over the world. We also provide exclusive research on these assets to help you optimize your strategy.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Commodities

Commodities such as oil, gas and copper are often used in strategies to diversify portfolios. With Swissquote, you can trade on major commodities through different types of contracts.

The table below shows the details for each type of CFD, as well as which platform they are available on.

Contracts	Underlying Assets	Expiration Date	Swap/Rollover	Commission	Platforms
Spot	Indices	✗	✓	✗	Advanced Trader , MetaTrader
Synthetic	Commodities	✗	✓	✗	Advanced Trader
Forward	Indices , Commodities , Bonds	✓	✗	✓	Advanced Trader , MetaTrader

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

CFDs Commodities Trading Conditions

Symbol	Description	Minimum Spreads (points)			Margin Requirement	Currency	Min. Transaction Size*		Max. Transaction Size*	
		Premium	Prime	Elite			MetaTrader	Advanced Trader	MetaTrader	Advanced Trader
#GASM	Forward Gasoline	0.14	0.14	From 0.0 pips + EUR 2.5 per side per lot	10%	USD	0.01	1'000	10	420'000
#GSOM	Forward Gasoil	0.50	0.50		10%	USD	0.01	1	10	1'000
#HGCM	Forward US Copper	0.30	0.30		10%	USD	0.01	1'000	10	1'000'000

Forward expiration dates are available on the website: <https://en.swissquote.eu/forex/pricing>

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Bonds

Treasury bond prices go up when interest rates decrease and go down when interest rates increase, making them a vital tool in hedging strategies. Swissquote's primary treasury products are the US T-Bond, the British Long Gilt and the German Bund.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

The table below shows the details for each type of CFD as well as the platform they are available on.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Trading Conditions Guide

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Trading Conditions Guide

1. Pips

A pip is the smallest price change that any currency or financial instrument can make. For most currency pairs, it is equal to a 0.0001 price change in the quote currency. In currencies with low unit price, a pip can represent 0.01 units, one notable example being the Japanese Yen.

2. Transaction sizes

Swissquote offers flexible transaction sizes throughout all of its trading platforms. In addition, whenever the markets are open, our trading desk is available to assist you in placing orders, including transaction sizes greater than the ones stated in the conditions tables above.

3. Trading Hours

Swissquote maintains a 24 hour trading operation available for you by telephone or through all of its trading platforms whenever the markets are open, starting from 23:00 CET Sunday to 23:00 CET Friday.

4. Swap rates

Swap rates, also known as overnight or rollover rates, are either earned or paid for holding a position overnight. Swissquote settles overnight positions at 23:00 CET using the applicable formula and swap rates table below.

Calculation Example:

AUDJPY Short/Long Swap Rate: -0.00784983 / 0.00455597

Position: Sell 100'000 AUDJPY

AUDJPY Exchange Rate: 96.553

MetaTrader Swap Formula:

(Base Amount * Short Swap Rate) / AUDJPY exchange rate)

$(100'000 * -0.00784983) / 96.553 = \text{You pay } 8.13 \text{ AUD}$

Advanced Trader Swap Formula:

(Base Amount * Short Swap Rate)

$(100'000 * -0.00784983) = \text{You pay } 784.98 \text{ JPY}$

Swissquote applies a triple swap on **Wednesday 23:00 CET** to account for weekend rollovers.

There are some exceptions to this rule:

- Triple swap rollovers will be applied **Thursday 23:00 CET** for USDCAD, USDTRY and USDRUB.
- Triple swap rollovers will be applied **Friday 23:00 CET** for LCOUSD, NGCUSD, OILUSD.

All swap rates are available on the website: <https://en.swissquote.eu/forex/pricing>

Client Position	Negative Swap Rate	Positive Swap Rate
Long	You Receive	You Pay
Short	You Pay	You Receive

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

5. Overnight costs and borrowing fees for Stock CFDs

By opening and closing a CFD position within the same day, you avoid overnight costs. However, if you hold a CFD position overnight, your CFD position will be credited or debited for keeping your positions open from one day to the next. Finally, a borrowing fee will apply when holding a short CFD position overnight.

6. Cash adjustments

When any underlying stock that is part of a Spot Stock Index goes ex-dividend, the Spot Stock Index will be price adjusted to reflect this dividend. The weighted proportion of the applicable dividend within the Spot Stock Index will be credited (Long Positions) or debited (Short Positions) as a cash adjustment on your account on the Ex-date reflecting the market price movement on the Ex-dividend date. Only open positions held overnight on ex-dividend date are subject to dividend cash adjustments.

Please note: Spot Germany 30 is a Total Return Index, meaning the index is automatically adjusted for dividends.

7. Cash dividends on Stock CFDs

Stock CFDs may be subject to dividend adjustments credited to the client's account for long positions or debited from the client's account for short positions. Dividends are booked on the execution date and paid on the next day. The table below shows the final percentage of dividends received by the client after withholding taxes.

Country	% client receives on LONG position	% client pays on SHORT position
SWITZERLAND	65	100
GERMANY	73.625	100
SPAIN	85	100
FRANCE	85	100
UNITED KINGDOM	100	100
IRELAND	100	100
ISRAEL	75	100
ISLE OF MAN	100	100
LUXEMBOURG	85	100
NETHERLANDS	85	100
JERSEY	100	100
CAYMAN ISLANDS	100	100
USA	70	100

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

8. Handling of corporate actions

The following corporate actions will cause your positions to be automatically closed on your behalf. We strongly recommend closing them before any such corporate action:

- Splits & Reverse Splits
- Acquisitions & Mergers
- Spin-offs
- Some specific stock dividends

9. Leverage & Margin Requirements

By default, Swissquote has an initial margin requirement of 3.33% on most popular FX instruments, meaning that you need collateral on your account equal to 3.33% of the notional value of the position you want to open. In other words, your positions can be leveraged up to 30 times.

Leverage Example:

In order to buy 100'000 EUR/USD at the ask price of 1.06 you would need 106'000 USD. With a leverage of 30:1 you only need to have the equivalent of 3'533.33 USD of available cash on your account.

Margin level calculation example

$((\text{Account Balance} + \text{Unrealized P\&L}) / \text{Margin requirement on net open position}) \times 100 = \text{Margin Level}$

Trader X has 10'000 USD Balance with an unrealized P&L of 1'000 USD. The open positions include long 300'000 USD/CHF and short 200'000 USD/CHF. Net open position is 100'000 USD/CHF.

$((10'000 \text{ USD} + 1'000 \text{ USD}) / 3'333.33 \text{ USD}) \times 100 = 330\% \text{ Margin Level}$

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

10. Stop Out Level

Subject to the limitations set forth in the General Terms and Conditions, the Risk Disclosure Statement to which we draw your attention. Swissquote's trading platforms are designed to automatically trigger a liquidation of open positions when the Margin Level ($[\text{equity}/\text{used margin}] \times 100$) reaches the Stop Out level which varies depending on the technology you are using (the "Automatic Liquidation System").

The Automatic Liquidation System has been set up for the sole benefit of Swissquote Capital Markets Ltd. While the Automatic Liquidation System aims at avoiding that the Client is losing more than the Forex Margin and while Swissquote Capital Markets Ltd will ensure that in the vast majority of cases the Automatic Liquidation System is activated as soon as the Liquidation Percentage is reached it is entitled but not obliged to do so. No warranty is given by Swissquote Capital Markets Ltd in this regard.

A. Advanced Trader

The table below displays the stop out level based on your Total Open Position in USD. Unless previously agreed and subject to the limitations set forth in the General Terms and Conditions, the Risk Disclosure Statement when the stop out level is reached Swissquote will apply a First In First Out (FIFO) liquidation policy realizing the oldest positions first until the margin level returns above the stop out level.

TOTAL OPEN POSITION (USD)	STOP OUT LEVEL
\$1'000 through \$30'000'000	0.50%
\$30'000'001 through \$40'000'000	1.00%
\$40'000'001 through \$50'000'000	1.25%
\$50'000'001 through \$60'000'000	1.50%
\$60'000'001 through \$70'000'000	1.75%
Over \$70'000'000	2.25% or greater

B. MetaTrader

Subject to the limitations set forth in the General Terms and Conditions, the Risk Disclosure Statement when the Margin Level falls below 50%, positions with the largest loss (regardless of their size) will be liquidated first, until the margin level is back to 50% or more.

Please note that, in the case of aggregated positions exceeding the maximum transaction size on MetaTrader 5, such positions will first be liquidated up to the maximum transaction size. If the margin level is back to 50% or more after this first liquidation, no further liquidation takes place.

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. The vast majority of retail client accounts suffer capital losses when trading in CFDs. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
