Chapter 3: [Functional Performance Criteria \(FPC\)](#)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	SUSE Linux Enterprise Server 15 does not include speech software for the command line. The Orca screen reader is available for the GUI, and brltty provides Braille support for the GUI (via Orca) and the console. A blind user can install or log into a SLES system from another computer via a ssh connection. YaST, the set-up tool, has both a QT and a Curses (text) interface. The curses interface is more usable with a screen reader, although it does not currently use the caret to track the highlighted item, which can make it cumbersome to use. Also, RDP does not encapsulate accessibility APIs, so third-party applications relying on it may not be accessible using a screen reader.
302.2 With Limited Vision	Partially Supports	A magnifier is not available for the console, but the GUI does include a magnifier.
302.3 Without Perception of Color	Supports	
302.4 Without Hearing	Supports	
302.5 With Limited Hearing	Supports	
302.6 Without Speech	Supports	

Criteria	Conformance Level	Remarks and Explanations
302.7 With Limited Manipulation	Partially supports	Accessibility options are available for the GUI, via the gnome-shell accessibility menu..
302.8 With Limited Reach and Strength	Supports	
302.9 With Limited Language, Cognitive, and Learning Abilities	Does Not Support	Depending on the specific disability, some people may find the content to be difficult to understand, although the operating system and its documentation have been translated into multiple languages.
