# PROFISEE MDM SAAS FOR TURN-KEY MANAGEMENT AND HOSTING

As a platform technology, multi-domain master data management (MDM) has been challenged with the limitations of previous cloud deployment models. But by leveraging new approaches to containerization, MDM can at last leverage the power of the cloud without giving up the all-important flexibility of the platform. Looking to fully transition to the cloud? Now you can make it happen.

Profisee is the first MDM platform to embrace full containerization and enable true SaaS (Software as a Service) deployment with the full, multidomain functionality of the Profisee platform. Profisee MDM SaaS is the fastest path to trusted data with comprehensive management and cloud hosting in a single, turn-key service.

PROFISEE MDM SAAS DEPLOYMENT

Profisee MDM is a commercial off-the-shelf software platform designed for easy cloud deployment in Azure. It is available to purchase and deploy through the Azure Marketplace as a SaaS (Software-as-a-Service hosted on Azure and managed by Profisee) or PaaS (Platform-as-a-Service deployed in customer's tenant) model. Profisee MDM SaaS runs on native Azure infrastructure (AKS, SQL Elastic Pool, etc.) for efficient deployment, maintenance and high availability. The software itself is deployed as Windows Container pods in Kubernetes.

When deployed as a full SaaS turn-key service, Profisee is hosted on Azure and managed by Profisee into a multi-tenant infrastructure, using Kubernetes namespaces and separate databases in the SQL Elastic Pool for tenant isolation. All customers are running the same Windows Container images which run the Profisee software.
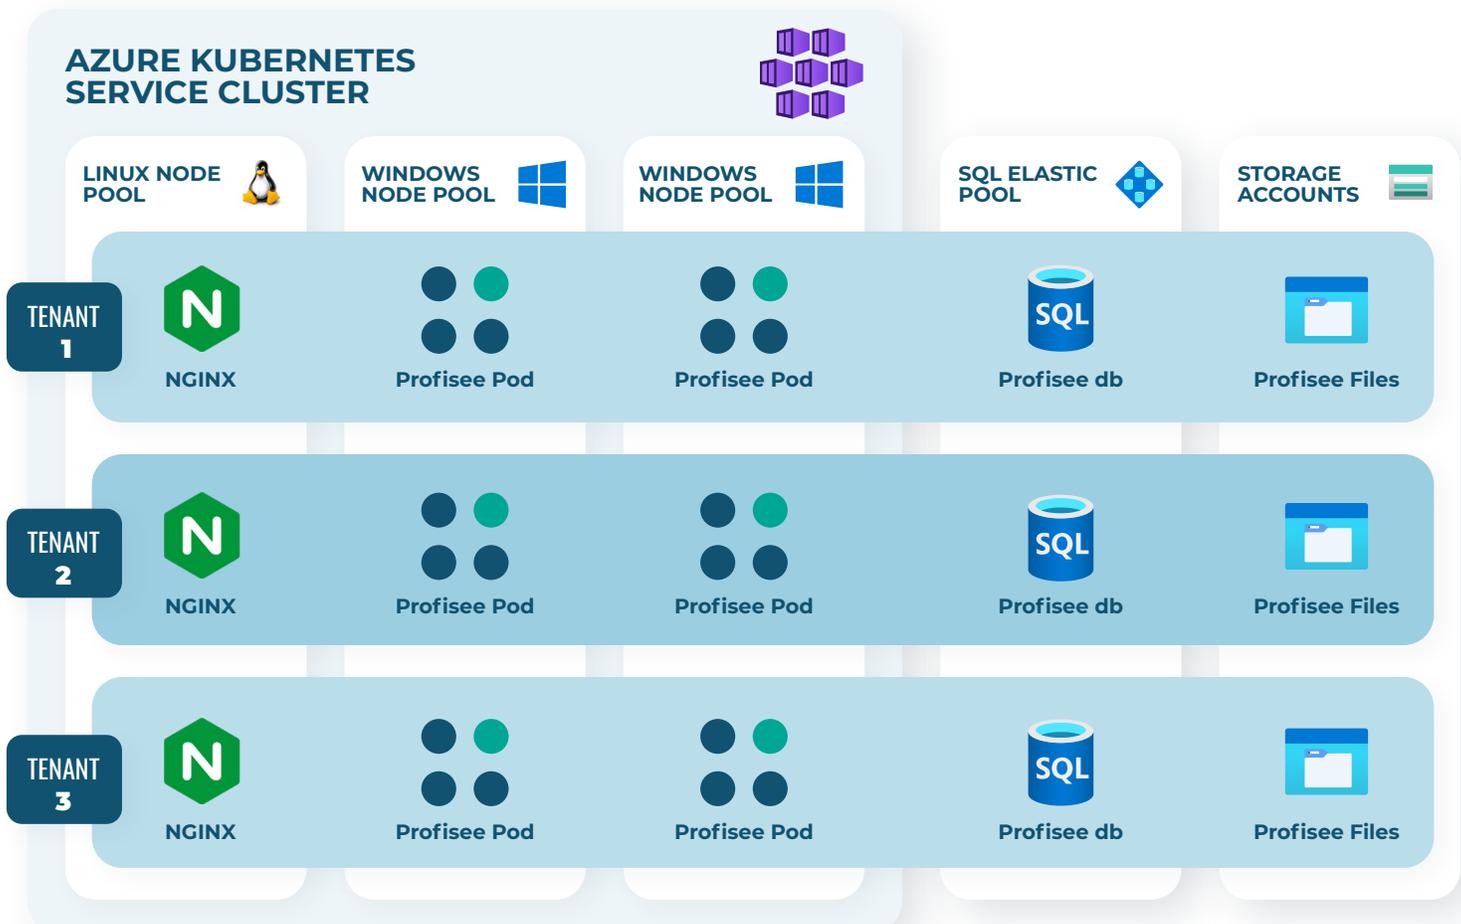

PROFISEE MDM SAAS: AVAILABLE, RELIABLE, SECURE

Profisee MDM SaaS uses a combination of availability zones, cross-region replication, and cross-region failover to provide high availability for clients. Profisee maintains 99.9% availability (same as AKS – equivalent to maximum 9 hours downtime per year).
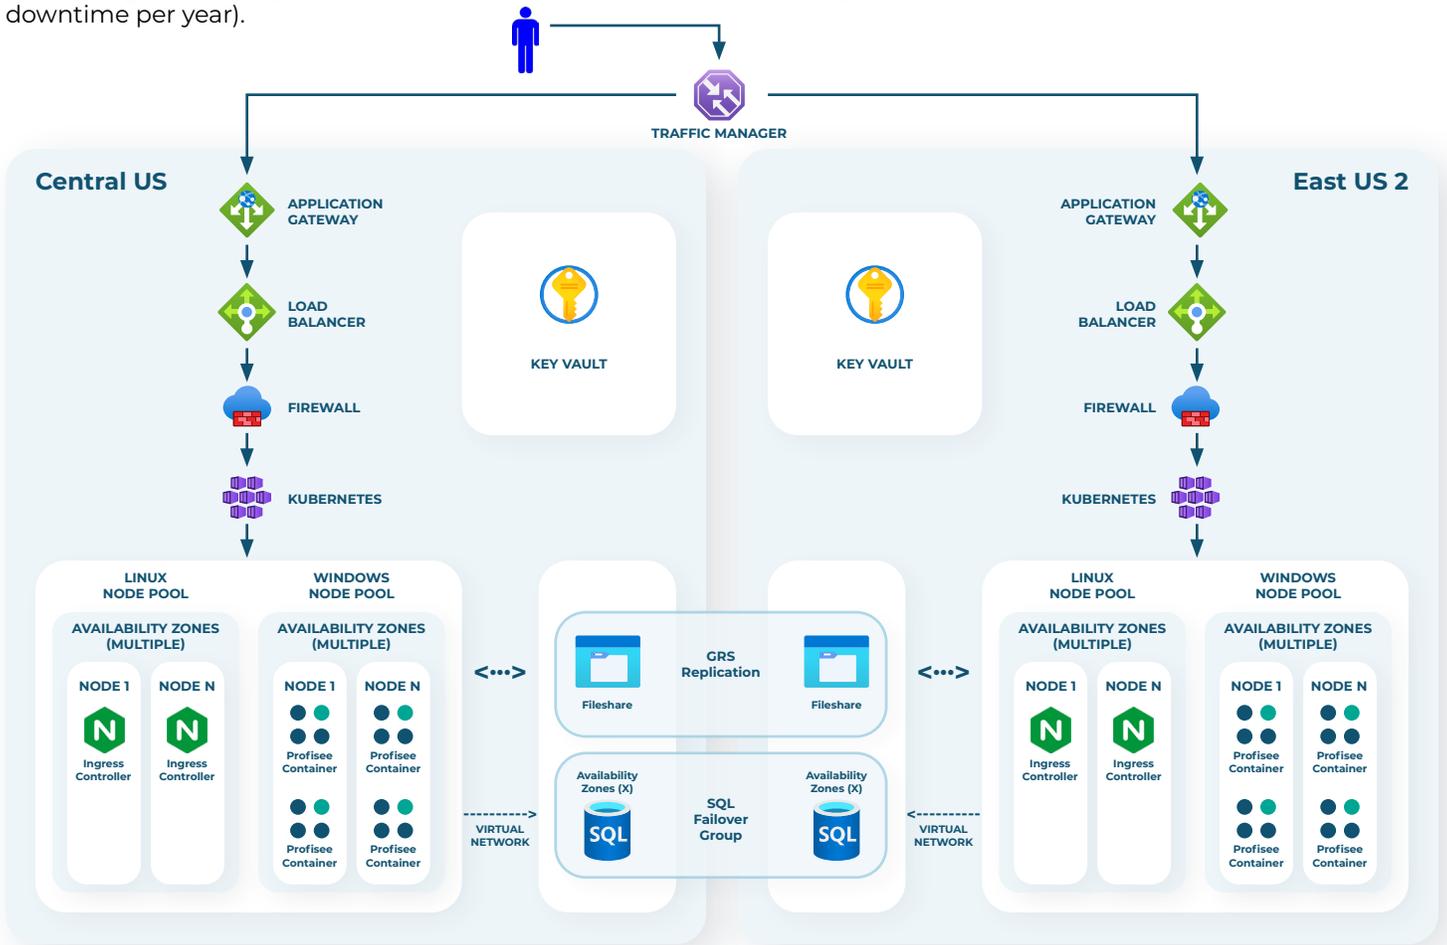

Profisee Cloud operations are 100% automated using Terraform and infrastructure-as-code to avoid the possibility of human error leading to an outage or security breach.

- **Encryption of Data at Rest and in Transit**
- **Tenant Isolation**
- **Network Security**

- **Access Security**
- **Logging**
- **Third-Party Network Audits**

- **Third-Party Application Testing**
- **Cybersecurity Insurance**
- **Integrated with customer single sign-on**

SEAMLESS DEPLOYMENT WITH FAVORABLE VOLUME-BASED PRICING

Profisee MDM SaaS includes Dev, QA, and Production environments in a single purchase agreement that includes standard Profisee subscription license, Azure hosting and active management. Profisee MDM SaaS can grow with you as your needs change, and you only pay for the data volumes you need.

ABOUT PROFISEE

Profisee MDM is how enterprises can finally solve the data quality issues that have been holding back so many strategic initiatives. With the industry's only "make it easy, make it accurate, make it scale" approach to data management, Profisee helps companies get past the "brick wall" of data quality issues without the cost, complexity and risk of traditional MDM solutions.

Customers can leverage Profisee MDM SaaS for a true Software-as-a-Service experience, or maintain complete deployment flexibility in any cloud, on-premise or via a hybrid model. With low total cost of ownership, fast implementations and a truly flexible multidomain platform, Profisee fully cleans and unifies your enterprise data — so you can finally make it happen.
