

Safera Siro

Discreet stove guard in the cooker hood

Safera Siro is a stylish and discreet stove guard, that comes in the hood you want. Safera Siro melts seamlessly into your modern and stylish kitchen and it can also be installed in a kitchen island.

SAFERA[®]

We sense what humans don't

More than a stove guard

Prevents cooking fires

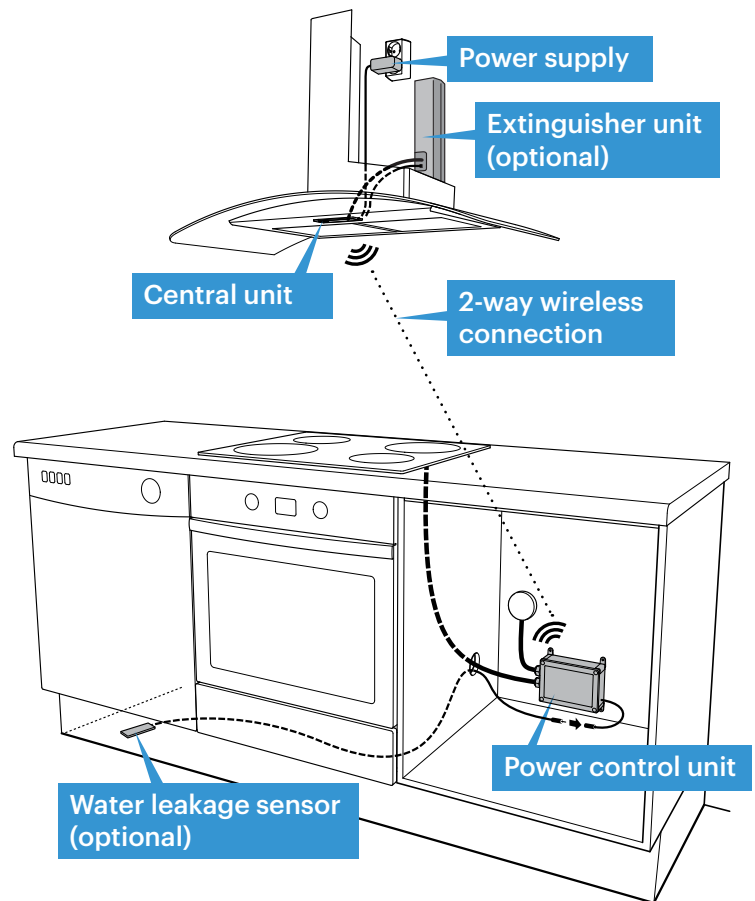

- Sounds an alarm in a hazardous situation.
- If the alarm is not reset: stops the situation by switching off power from the stove.
- Extinguishes fires if necessary (optional).
- Childproof lock prevents unattended use of the stove.

Prevents water damages

- Optional accessory
- Prevents damage caused by water leaks by sounding an alarm if a leak is detected.

Available in a wide range of cooker hood designs, also available for kitchen islands. See below some of the available models.

Recommended by

Fire authorities

"Cooking is the #1 cause of home fires and they cause a lot of extra work for fire service. With Safera stove guard, cooking fires can be reduced very efficiently. It should be installed in every kitchen".

Insurance companies

"We have tested a lot of stove guards on the market, and we chose Safera to be recommended to our customers. We also use Safera in all of our own rental houses to protect our long-term investments."

TRYGG HANSA

Gjensidige

Home care providers

"With Safera stove guard elderly people are able to use the cooker safely which reduces work for caretakers. Safera is automatic and gives no false alarms. The remote alarm is also very handy."

Electricians

"Fastest installation on the market and unbeatable quality with great price. Safera stove guards meet the EN 50615 standard and all electrical requirements, so I feel confident installing them."

Accessory: Water leakage sensor

Prevents damages caused by water leaks by sounding an alarm if a leak is detected. One stove guard can accommodate up to four detectors, which can be placed under most typical leakage points such as the sink or dishwasher.

Five reasons to choose Safera stove guard

Safera has the widest product range of stove guards. Whichever Safera stove you choose, you can always be sure that your stove guard is equipped with state-of-the-art technology.

1 Standard EN 50615 compliant

All Safera stove guards fulfill the stove guard standard EN 50615. Safera has been the key expert in the European stove guard standard working group.

2 Award-winning solution

Safera has won numerous awards and succeeded in several tests internationally.

3 Advanced intelligence

Safera Sense4® -intelligence is based on four different sensors. Safera stove guards act quickly in various hazardous situations without disrupting your cooking.

4 Reliable wireless connection

Safera RobustLink® wireless connection is designed for safety critical applications. Installation is easy also with kitchen islands.

5 A stove guard for every home

Integrated Safera IN-line stove guards are best for when you are building a new house or renovating an old one. Safera R-line fits both new and existing homes, also when only the kitchen safety is being updated.
